

TOC Runway Walking Path Update April 18, 2026

Dear all.

For many years there has been a rough walking path along the tree-line on the Southern edge of the Runway, turning north at the end of the Runway and skirting the edge of the “old” Wetlands and exiting via the pump house track and Avalon Court. Now that the Wetlands Project is nearly completed I wanted to apprise you of recommended next steps.

The Board recommends that we essentially use the route of the old path now that the extent of the Wetland project is visible with some minor changes.

The walking path will commence at the western end of the tree line and Runway, run east between the tree line and the southern boundary of the Runway and turn northwards at the junction with the former (“old”) Wetlands. It will continue beyond the sand berm to meet the path to the beach and allow exit via Avalon Court.

We think that this should satisfy the needs of our community for access and minimize privacy and safety concerns of homeowners. We will revisit this recommendation at the AGM in May. If you have any other recommendations or concerns please give me a call.
